

# Hydrafacial

## What is Hydrafacial

HydraFacial is the only hydradermabrasion procedure that combines cleansing, extraction and hydration simultaneously, resulting in clearer, more beautiful skin with little-to-no downtime. The treatment is soothing, moisturizing, non-invasive and generally non-irritating. As with most procedures, visible results from HydraFacial will vary from person to person.

## During Treatment and Post-Treatment Instructions

- Your skin may experience temporary irritation, tightness, or redness. These are all normal reactions that typically resolve within 72 hours depending on skin sensitivity.
- You may experience tingling and stinging during the treatment area. These sensations generally subside within three hours of treatment.
- You will likely see results immediately after treatment and your skin will feel smooth and hydrated for one to four weeks.
- Avoid direct sunlight and use a minimum of SPF 40 sunscreen
- Aggressive exfoliation, waxing and products containing acids should be avoided in the treatment area for a minimum of two weeks pre and post-treatment.
- Avoid the use of Retinol products pre-and post-treatment.
